India turns hotspot for smartphone brands

Chinese majors maintain a dominant position in the country

SURAJEET DAS GUPTA
New Delhi, 3 February

For Apple Inc, India accounted for 6 per cent of its global iPhone sales volume in the fourth quarter (Q4) of calendar year (CY) 2024, driven by the iPhone 15, which was the best-selling smartphone in India during the quarter, according to estimates by Counterpoint Research.

KEY MARKET

Source: Counterpoint Research

a dominant position in India, increasing their share of the global smartphone sales volume.

In Q4 CY 2024, India accounted for 33 per cent of Vivo's global sales volume, up from 31 per cent in the same quarter last year. It also increased its share of the Indian market to 20 per cent, displacing Xiaomi, which held the top slot in the same quarter last year.

For Oppo and OnePlus combined, India accounted for 27 per cent of global sales, up from 23 per cent last year in the same quarter. Only Xiaomi saw a decrease, with India accounting for 15 per cent of

its global sales volume. Says Shilpi Jain, senior research analyst at Counterpoint: "India is the second-largest smartphone market in the world."

According to Counterpoint's latest data, in Q4 of CY 2024, India's share of global smartphone sales volume increased by 1 percentage point, reaching 13 per cent of global volume sales compared to the previous year.

Kendrick Lamar's *Not Like Us* clinched five wins including Song of the Year, Record of the Year

India's ad industry may grow at 6.5% to hit ₹1.1 trn by yr-end

ROSHNI SHEKHAR
Mumbai, 3 February

India's advertising industry is projected to grow at 6.5 per cent in 2025 to reach a market size of ₹1.1 trillion by the end of the year, majority driven by the digital segment, according to Dentsu e4m Digital Report 2025.

Digital media has emerged as the largest platform for advertising spending, accounting for 49 per cent, that is ₹49,251 crore, of the Indian advertising industry. This is followed by television contributing 26 per cent (₹28,062 crore) and print media 17 per cent (₹17,529 crore).

'AD'DING VALUE

Size of India's ad industry (₹ crore)

Source: Dentsu e4m Digital Report

Increased spending on reality shows, sports content across TV and over-the-top (OTT) platforms, and large-format print advertising, the report stated. Ecommerce, automotive, BFSI (banking, financial services, and insurance), fast-moving consumer goods (FMCG), and retail

continue to dominate both digital and traditional media.

In recent years, the out-of-home (OOH) advertising segment included new formats like digital displays, airport billboards, and digital OOH (DOOH). DOOH ad spend reached ₹3,600 crore in 2023, reflecting

aggressive adoption by advertisers. TV's share fell from 31 per cent to 26 per cent between 2023 and 2024, and is expected to drop further to 24 per cent in 2025. Print media followed a similar trend, decreasing from 20 per cent to 17 per cent by the end of 2024, with projections suggesting a further decline to 15 per cent by 2025-end, the report stated. Radio, which maintained a steady share of 2 per cent in 2024, is expected to decline to 1 per cent by the end of the year, reflecting the shifting dynamics of the advertising landscape.

"Looking ahead, OOH is projected to grow at a compound annual growth rate (CAGR) of 10 per cent through 2026, driven by various

factors," the report said. Digital and OOH are the only media segments with a positive growth outlook until 2026, reflecting the Indian advertising industry's shift towards platforms offering greater engagement and flexibility. In contrast, traditional media like TV, print, radio, and cinema are projected to witness a decline over the same period — a point collectively showcased through top media companies' results in the July-September quarter (Q3FY25). This overall growth of the advertising industry is projected to accelerate in 2026 when it will grow at 7.2 per cent, driving the market size to over ₹1.15 trillion, according to the report.

CHATGPT GETS NEW AI AGENT

OpenAI has unveiled "Deep Research", a new AI agent integrated within ChatGPT. Powered by an iteration of the company's forthcoming GPT series reasoning model, this tool automates multi-step research on the web. According to OpenAI, it can process and interpret text, images, and PDFs found online to compile detailed reports on user-specified topics. The feature is currently available exclusively to ChatGPT Pro subscribers.

Microsoft Paint gets Copilot button

Microsoft has added a dedicated Copilot button on the toolbar in Paint, offering quick access to various AI-driven image editing tools through a drop-down menu. These include OpenAI's DALL-E-powered CoreCoator for text-to-image generation, Generative Erase, Remove Background. The update is currently available in the latest version of Paint for Windows insiders.

Vivo V50 launching soon

China's Vivo is set to launch its V50 smartphone in India soon. The upcoming smartphone will be a camera-centric device, featuring an imaging system developed in collaboration with German optics company Zeiss. The Vivo V50 will likely be powered by the Qualcomm Snapdragon 7 Gen 3 processor and come equipped with a 6000mAh battery.

KANOCHAR

Power Transformers and Reactors

Building Blocks for Power and Rail Networks of Viksit Bharat 2047

The rapid growth of renewable energy has brought challenges like voltage instability and fluctuating power flows, making grid reliability a critical concern. Modern grids need solutions that can adapt to these complexities while ensuring stable and efficient operations.

KANOCHAR offers advanced Shunt Reactors up to 125 MVAR, 400 kV, designed to regulate voltage and enhance grid stability. Alongside, our Power Transformers up to 500 MVA, 400 kV, provide comprehensive solutions for modern power systems. Trust KANOCHAR for reliable and innovative energy solutions.
